

CSA0502 – QUERY PROCESSING FOR DATASCIENCE

Name: Syed Khasim Ameen **Reg No:** 192324215

QUESTION 19

AIM

To display dataset dimensions and column names.

QUESTION

Write a Pandas program to display the dimensions or shape of the World alcohol consumption dataset. Also extract the column names from the dataset.

CODE

```
import pandas as pd
df = pd.read_csv("world_alcohol_consumption.csv")
print("Shape:", df.shape)
print("Columns:", df.columns.tolist())
```

OUTPUT

```
Shape: (4, 4)
Columns: ['country', 'beer_servings', 'wine_servings', 'spirit_servings']
```

RESULT

The program executed successfully and produced the required result.
