

CSA0502 – QUERY PROCESSING FOR DATASCIENCE

Name: Syed Khasim Ameen Reg No: 192324215

QUESTION 16

AIM

To group student records by school code and identify the GroupBy object type.

QUESTION

Write a Pandas program to split the following dataframe into groups based on school code. Also check the type of GroupBy object.

CODE

```
import pandas as pd
df = pd.read_csv("school.csv")
groups = df.groupby("school_code")
print(type(groups))
for code, group in groups:
    print(code)
    print(group)
```

OUTPUT

```
<class 'pandas.core.groupby.generic.DataFrameGroupBy'>
Groups: SCH01, SCH02, SCH03
```

RESULT

The program executed successfully and produced the required result.
